Abubaker Chughtai

BS Software Engineering Student @ UMT Lahore | Learning Software Development | Exploring Modern Technologies
Lahore, Punjab, Pakistan

Summary

I’m a Software Engineering student at the University of Management and Technology (UMT), Lahore, passionate about building practical and meaningful software solutions.My current focus is on software development, AI, and full-stack technologies. I’ve worked on projects involving FastAPI, machine learning model deployment, database systems, requirements engineering, and system design, while building a strong foundation in Python, C++, SQL, and software engineering principles.Beyond technical development, I’ve gained hands-on experience in client communication, customer service, and educational consulting. These experiences have helped me develop a better understanding of user needs, communication, and problem-solving — perspectives I bring into my approach to software design.I’m currently exploring AI-native startup ideas and continuously learning new technologies to strengthen my engineering skills.I’m always open to connecting with developers, software engineers, founders, and technology enthusiasts to learn, collaborate, and build impactful solutions.Learning • Building • Exploring • Growing

Experience

Pakistan Law Bot
Customer Service Sales Representative
January 2026 - Present (9 months)
Lahore, Punjab, Pakistan

Respond to customer queries and provide support for Pakistan LawBot, a Pixel PK product. Maintain and update lead records on CRM and Google Sheets for accurate tracking and follow-up.
